

Maths Game: Feed the Penguin Game/polar bear

1. Either print your penguin and fish from twinkl (on our class website) or use a box to make your own polar bear/penguin to feed like this:

2. Next you will need to make some paper fish. They don't need to be fancy; you can just cut fish shapes from paper.

3. Now you can play the game. Your child can roll a dice then select the correct number of fish to feed their penguin/polar bear. They can either play by themselves and keep rolling and counting until all the fish have been eaten or play by taking turns with another player.
